To help families manage an intense medical-related event, Power and Dell Orto propose that a family-oriented life and living perspective should be combined with a family intervention philosophy. Stressing acknowledgment of the adverse effects of the illness and an affirmation approach to family struggle and opportunities, the authors explore issues relevant to treatment, family adaptation, quality of life, and family survival. A unique feature of the text includes the organization of the chapters around thought-provoking personal statements followed by questions/experiential tasks designed to stimulate thought and discussion. This book is must reading for health and allied health professionals including physicians, nurses, rehabilitation counselors, social workers, psychologists, and family advocates and will serve

Infants, Toddlers and Caregivers is an ideal introduction to care and education in the first three years of life, featuring a respectful approach inspired by field pioneers Magda Gerber and Dr. Emmi Pikler. The text provides practical information based on theoretical and research foundations that students can implement in a variety of infant and toddler settings. At a time in early childhood education when school readiness and technological devices and screens for the very young are hot topics, this text focuses on the value of free play, the development of self-reliance, and the importance of responsive, respectful interactions.

What ' s the difference between an activity and an experience? One is meant to pass the time, the other to last a lifetime. Make the most of your interactions with young children with experiences that allow infants and toddlers to figure out how something works on their own. This book describes a process of learning that involves repeated interaction with and exploration of a caring environment, which builds trust between children and you. Each experience offers children the chance to choose their own approaches to tasks that promote their development. Focusing on the “ Three Cs ” —curiosity, connection, and coordination—each experience is described simply and includes a list of materials that are needed and tips to keep

board. In addressing the place of care in liberalism, this collection advances the idea that care ethics can help respond to legitimate criticisms from feminists who argue that liberalism ignores issues of race, class, and ethnicity. The chapters do not simply add care to existing liberal political frameworks; rather, they explore how integrating dependency might leave core components of the traditional liberal philosophical apparatus intact, while transforming other aspects of it. Additionally, the contributors address the design of social and political institutions through which care is given and received, with special attention paid to non-Western care practices. This book will appeal to scholars working on liberalism in philosophy, political science, law, and public policy, and it is a must-read for feminist political

philosophers.

This collection focuses on child welfare in its specific sense: welfare and social interventions with children and young people undertaken by State bodies or NGO's. The term 'child welfare' is deployed differently in diverse international settings. In the United Kingdom child welfare tends to refer to individualised programmes for children who have experienced problems in their lives. In India, to take a contrasting example, it can also refer to major housing and nutrition programmes. This collection takes an inclusive approach to international perspectives. The collection is completed by a new general introduction by the editor, individual volume introductions, and a full index. Titles also
