It's Stephany and Max's first holiday away together and they want to get to know each other. They go to Italy and stay at Stephany's friend Carlo's flat in a Mediterranean village. But Carlo's wife is not very happy to see Stephany - and the two couples find out why, and a lot of other things about each other, in a hot Italian summer.

A companion to Anne McCaffrey's dragon series

In the 2007 third edition of her successful textbook, Paula Rudall provides a comprehensive yet succinct introduction to the anatomy of flowering plants. Thoroughly revised and updated throughout, the book covers all aspects of comparative plant structure and development, arranged in a series of chapters on the stem, root, leaf, flower, seed and fruit. Internal structures are described using magnification aids from the simple hand-lens to the electron microscope. Numerous references to recent topical literature are included, and new illustrations reflect a wide range of flowering plant species. The phylogenetic context of plant names has also been updated as a result of improved understanding of the relationships among flowering plants. This clearly written text is ideal for students studying a wide range of courses in botany and plant science, and is also an excellent resource for professional and amateur horticulturalists.

A multi-volume English language textbook with alphabetically arranged entries on such topics as grammar, style, punctuation, and writing and research skills.

Both an official chronicle and the highly personal memoir of the emperor Babur (1483–1530), The Baburnama presents a vivid and extraordinarily detailed picture of life in Afghanistan, Pakistan, and India during the late-fifteenth and early-sixteenth centuries. Babur's honest and intimate chronicle is the first autobiography in Islamic literature, written at a time when there was no historical precedent for a personal narrative—now in a sparkling new translation by Islamic scholar Wheeler Thackston. This Modern Library Paperback Classics edition includes notes, indices, maps, and illustrations. From the Trade Paperback edition.

The book contains blackline masters of stimulating activities in mathematics...\_

"Mathematics for Engineers I" gehört zu einer vierbändigen Reihe und gibt eine Einführung in die Mathematik für Undergraduates, die ein Bachelor-Studium im Bereich Ingenieurwissenschaften aufgenommen haben. In Band I sind die Grundzüge des klassischen Calculus dargestellt. Die Reihe unterscheidet sich von traditionellen Texten dadurch, dass sie interaktiv ist und mit Hilfe des Computer-Algebra-Systems Mathematica die Berechnungen darstellt.
