Developed for helping professionals, *Counseling Theory and Practice* explains what it means to be an effective helper, discusses foundations of classic counseling and psychotherapy theories, provides an overview of emerging theories, and gives students the opportunity to develop their own approaches to counseling and psychotherapy practice. The book is organized into four primary sections, each addressing theoretical schools. Section 1 explores psychodynamic approaches, including psychoanalysis, Jungian therapy, and Adlerian therapy. Section 2 is devoted to existential-humanistic approaches such as existential therapy, Gestalt therapy, and person-centered counseling, while Section 3 discusses cognitive-behavioral approaches, including behavior therapy, cognitive behavior therapy, rational-emotive behavior therapy, and reality therapy. Section 4 describes post-modern therapies and examines the relatively new approaches of narrative therapy, solution-focused brief therapy, and relational cultural therapy, a form of feminist therapy. The final chapter explores a number of more recent and emerging theories. In support of the textbook, *Counseling Theory and Practice* features a Cognella Active Learning component that provides students with videos, reflection exercises, PowerPoint slideshows, flashcards, and quizzes in a digital environment. These additional materials give students an accessible way to study outside of the classroom in their own time and at their own pace.
