When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer's and Engineer's Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer's role in the preparation of

Contract tenders, which fully reflect his requirements and duties and obligations arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language). Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author's earlier book, Contractor's Guide to the FIDIC Conditions of Contract - which describes the duties, rights and responsibilities of the Contractor - represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book's companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model Form of Engineer's Order for Varied Works Model Form of Daywork/Daily Record Sheets

Study of engineering education and practice conducted under the guidance of the National Research Council's Committee on the Education and Utilization of the Engineer. The panel's goal was to provide a data base that describes the engineering work force, its main activities, capabilities, and principal employers. Chapters included are: (1) "Introduction" (discussing the role of engineering); (2) "The Engineering Work Force" (describing the numbers and characteristics, aging and retirement, and women and minorities in engineering); (3) "Utilization of Engineers" (information on employment characteristics and efficiency of utilization); (4) "Quality of the Work Force"; (5) "Resilience of the Work Force"; (6) "International Comparisons"; and (7) "Supply and Demand for Engineers." Many tables and graphs are provided. Appended are data on engineering employment characteristics, a questionnaire and a summary of the results of the informal mail survey of employers of engineers, data on the employment of engineers, and a report on the support of engineering education by the Federal Government. "Women in Engineering" and "The Social Context of Minorities in Engineering" are also included in the appendices. (YP)

Download File PDF An Employers And Engineers To The Fidic Conditions Of Contract

Excerpt from General Conditions in Electrical and Other Engineering Contracts The author has obviously taken great pains to devise and word clauses so that they shall not only be fair to both Employers or Engineers and Contractors, but so that they shall be such as to ensure, so far as may be, that the work under the Contract shall be carried out with a minimum of possible disputes or even differences of opinion between the parties concerned. This result would carry with it, naturally, that the work, when completed, would have every prospect of being both satisfactory to the Employer and a credit to the Contractor. The author's view of the position of the Consulting Engineer is, I think, a right one. He is first, of course, the servant of his employer, whose interests it is his duty to protect, but he is also in the position of a quasi-arbitrator standing between the Contractor and the Employer and, to a certain extent, weighing their respective claims.
