Nasce dal sogno di un amico, durante una passeggiata con William Wordsworth, l'idea della Ballata del vecchio marinaio, la vicenda fantastica della maledizione che si abbatte sull'equipaggio di una na ...

Qui est Asterios Polyp ? Architecte, professeur, auteur, époux : tout cela fait partie du passé. Aujourd'hui qu'il franchit un demi-siècle d'existence, il est devenu l'ombre de ce qu'il était. Mais cette nuit-là, l'orage gronde et la foudre le précipite dans un voyage fatidique. David Mazzucchelli, dessinateur de talent, a bâti d'une main de maître cette histoire passionnante qui sonde les potentialités du roman graphique et le conduit dans de nouveaux territoires palpitants.

Asterios Polyp, its arrogant, prickly protagonist, is an award-winning architect who's never built an actual building, and a pedant in the midst of a spiritual crisis. After the structure of his own life falls apart, he runs away to try to rebuild it into something new.

Reading is a revolutionary act, an act of engagement in a culture that wants us to disengage. In *The Lost Art of Reading*, David L. Ulin asks a number of timely questions - why is literature important? What does it offer, especially now? Blending commentary with memoir, Ulin addresses the importance of the simple act of reading in an increasingly digital culture. Reading a book, flipping through hard pages, or shuffling them on screen - it doesn't matter. The key is the act of reading, and it's seriousness and depth. Ulin emphasizes the importance of reflection and pause allowed by stopping to read a book, and the accompanying focus required to let the mind run free in a world that is not one's own. Are we willing to risk our collective interest in contemplation, nuanced thinking, and empathy? Far from preaching to the choir, *The Lost Art of Reading* is a call to arms, or rather, to pages.

In his graphic novel *Asterios Polyp* David Mazzucchelli is concerned with the nature of human perception. He highlights the limitations of perception through his title character's struggle to find a new way to filter information from the world around him. Mazzucchelli reminds us that no matter which method a person uses to look at the world there will always be excess details that he or she will ignore or simply not notice due to perceptual blind spots. I argue that, while Asterios gains a new method for perceiving the world, his true victory is in his acknowledgement that all perceptions are limited. The acknowledgment of his inherent blind spots prepares Asterios to accept excess details when they appear. Through meta-art, Mazzucchelli uses this lesson to also teach the reader how to approach interpreting his graphic novel. He draws the reader's attention to a variety of analytical frameworks by referencing each one through a different character's perspective on art.

By creating a grid of interpretive approaches, I argue that Mazzucchelli does not encourage the reader to use one approach over another, but instead he wants the reader to realize that no approach will provide a complete reading of his work. The acknowledgement that all interpretive approaches have limitations, just like all methods of perception, prepares the reader to accept when excess details reveal something lacking in his or her analysis.

A carton of hate. A wedge of spite. A comic book of idiotic genius. The Eisner Award-winning dairy duo returns in this deluxe hardcover collecting every single stupid Milk and Cheese comic ever made from 1989 to 2010, along with a sh\*t ton of supplemental awesomeness. This has everything you need! Don't judge it—love it! Or else! □ Look for brand-new stories by Evan Dorkin in upcoming Dark Horse Presents issues! □ "Evan's calcium-rich creations are guaranteed to spread lactose intolerance everywhere."—David Mazzucchelli (Asterios Polyp, Batman: Year One)

"One of the most memorable things we've read in a long time." - io9 "Beautifully written and utterly gorgeous, DAYTRIPPER completely blew me away." - Gerard Way (Umbrella Academy, My Chemical Romance) What are the most important days of your life? F-bio Moon and Gabriel B- answer that question in the critical and commercial hit series that took the industry by storm, winning praise from such comics veterans as Terry Moore, Craig Thompson and Jeff Smith. Follow aspiring writer Br-s de Oliva Domingos as each chapter of DAYTRIPPER explores a completely different moment in his life. Moon and B- tell a beautifully lyrical tale chronicling Domingos's entire existence- from his loves to his deaths and all the possibilities in between. Introduction by Craig Thompson (BLANKETS).

Whatever Happened to the World of Tomorrow?, the long-awaited follow-up to Mom's Cancer, is a unique graphic novel that tells the story of a young boy and his relationship with his father. Spanning the period from the 1939 New York World's Fair to the last Apollo space mission in 1975, it is told through the eyes of a boy as he grows up in an era that was optimistic and ambitious, fueled by industry, engines, electricity, rockets, and the atom bomb. An insightful look at relationships and the promise of the future, award-winning author Brian Fies presents his story in a way that only comics and graphic novels can. Interspersed with the comic book adventures of Commander Cap Crater (created by Fies to mirror the styles of the comics and the time periods he is depicting), and mixing art and historical photographs, this groundbreaking graphic novel is a lively trip through a half century of technological evolution. It is also a perceptive look at the changing moods of our nation- and the enduring promise of the future. Praise for Whatever Happened to the World of Tomorrow? "A graphic novel that looks like TV's "Futurama" bred with The Golden Age of Comic Books, Whatever Happened to the World of Tomorrow? is at times charming, at times sad and foreboding, and always thought provoking." —Air & Space Smithsonian "A hopelessly optimistic moon-age daydream"—The Village Voice "An exceptional and highly engaging experience." —The Miami Herald "Whatever Happened To The World Of Tomorrow is a very special book that will speak to you on so many levels. And at the end of it, when you sit there and think on what you've just read, it may even make you, like it did me, realise that Fies' vision of our past and his hope for the future is something we can all share in. Quite brilliant."—Richard Bruton, forbiddenplanet.co.uk F&P level: Y

In a mid-21st-century nation devastated by civil war, botanist professor Paulie Panther researches strange plants at the high school of an experimental forest town and discovers its telepathic properties, a finding that singles him out as a brash individualist in a community of conformists. By the creator of Bottomless Belly Button.

The Three Paradoxes is an intricate and complex autobiographical comic by one of the most talented and innovative young cartoonists today. The story begins with a story inside the story: the cartoon character Paul Hornschemeier is trying to finish a story called "Paul and the Magic Pencil." Paul has been granted a magical implement, a pencil, and is trying to figure out what exactly it can do. He isn't coming up with much, but then we zoom out of this story to the creator, Paul, whose father is about to go on a walk to turn off the lights in his law office in the center of the small town. Abandoning the comic strip temporarily, Paul leaves with his camera, in order to fulfill a promise to his girlfriend that he would take pictures of the places that affected him as a child. Each "chapter" of the story is drawn in a completely different style, with strikingly unique production and color themes, and yet, somehow, despite (or perhaps because of) this non-linear progression, it all comes together as one story: a story questioning change, progress, and worth within the author's life.

A graphic, crime noir novel on a New York detective-cum-novelist who answers a wrong number. A double- barreled investigation, one from the perspective of the detective, the other from that of the novelist. Adapted from Paul Auster's City of Glass by the creators of Maus.
