Ford Engine Identification 351 Windsor

Identification The quickest way to identify a Ford 351 Windsor engine is to count the number of bolts on the valve covers. The valve covers are located on the top of the engine, one on either side of the air cleaner, and each will have six bolts. If the valve cover is removed, you will see "351" stamped on the cylinder head in the valve valley.

What's the Difference Between a Ford 351 Windsor ...

Although sometimes called the "Windsor" family by enthusiasts, Ford itself never named the engine family; the designation was only adopted to distinguish the 351 cu in (5.8 L) version from the Cleveland 335-family engine that had the same displacement, but a significantly different configuration.

## File Type PDF Ford Engine Identification 351 Windsor

Ford small block engine - Wikipedia

The 351 Cleveland is a member of the 335 series family of Ford small-block engines. Its large ports and oversize canted valves give it more horsepower and allow it to run at a higher rpm than the Windsor. The valve covers have a twisting curve and are attached by eight bolts. It uses small 14 mm spark plugs.

---

What Is the Difference Between the Ford 351 Windsor and ...

Ford produced the small block Windsor family of engines from 1961-2000. There were many variations available throughout the years. Visual Difference. The main difference between the blocks was the Deck Height. The 351 blocks were as much as 1.300 in. taller to allow for a longer Stroke.

351 Engine Specifications, Cleveland, Windsor, Boss ...

Ford 351 Cleveland Engines: Block Identification Guide There has always been some confusion when it comes to Cleveland block identification. The 351C block castings, despite different casting numbers, are all basically the same casting and can all be converted to four-bolt main caps with help from a qualified machine shop.

---

Ford 351 Cleveland Engines: Block Identification Guide

When the 351 Cleveland was discontinued after the 1974 model year, Ford needed another engine in that size range, since the production of the 351 Windsor was not sufficient. Ford took the 400 engine's tall-deck block and de-stroked it with a shorter 3.5 in (89 mm) stroke crankshaft to produce a 351 cubic inch (5.8 L) engine.
