For example, to plot the function  $\sin(x)$  on the interval  $[0;2\pi]$ , we first create a vector of  $x$  values ranging from 0 to  $2\pi$ , then compute the sine of these values, and finally plot the result:

```
1 2 3 4 5 6 -1 0 1 2 3 4

MATLAB is very popular in science and engineering fields, so it is highly likely that you'll be using MATLAB, Simulink or other toolboxes as your studies continue, and it's likely to find it at use in industry -- although it is entirely possible that you will choose a career path (or maybe the career path chooses you!) where MATLAB isn't a part of the skill set that's required.
