Informed consent is an important concept in medical care, but presents challenges in the critical care setting, where patients may have diminished capacity to provide their own informed consent. The elements of informed consent include adequate disclosure of information, cognitive capacity of individuals to make decisions, and the voluntary nature of such decisions.

Medico-legal and ethical issues - Oxford Medicine

Abstract. In obstetric anaesthetic practice, ethical and medico-legal problems revolve mainly around the ability of a woman in labour to give truly informed consent and the potential conflict between the best interests of the fetus and the mother. This contribution considers whether a woman in labour can be 'competent', the validity of birth plans, issues concerning information, maternal-fetal conflict and negligence claims.
