This volume ties together the histories of Japan and China for the modern period prior to the 20th century. The chapters look at Chinese and Japanese works which were written in response to events in the other country. None of these works has received any sustained attention in the west. As a result we get a view of how Chinese and Japanese saw each other at a time when there were few personal contacts allowed. Many of these texts were built on fanciful embellishments of stories that migrated from one land to the other. But the unique qualities of the Sino-Japanese cultural bond seem to have conditioned the interaction so that these texts all reveal a fascinatingly well-defined area.

This reference applies up-to-date moisture control and treatment techniques in a problem/solution format. Opening with an introductory explanation of the nature and causes of mold, mildew, and condensation, the volume gives specific advice on heated, cooled, and combination environments, plus a short course in the dynamics of moisture movement within buildings. Includes case studies and recommended practices for all US climates. For building contractors, architects, mechanical engineers, building product manufacturers, homeowners, and small commercial building owners. Annotation copyright by Book News, Inc., Portland, OR

Right in the heart of Graz, the second largest city in Austria, an entire city district had simply fallen into oblivion. Now, the industrial park of the former Reininghaus Brewery has been rediscovered. The new owners have taken up the search for answers: How, in future, do we wish to work and live? In his foreword, Clifford Pearson deputy editor of the Architectural record, writes: "I don't know what Reininghaus will be like when people start moving there. I have no idea if it will be a model that other developers or community builders will want to follow. But I am impressed with the way its founders are approaching their task. They're asking the right questions and talking to some fascinating people. They're thinking and wondering before they start defining and designing. By doing so, they've

gotten my attention.” The book presents the results of a research by structuring its content into: Life, Work, Urbanity and Education.

In an age of skepticism and disenchantment, people long for something that satisfies our mind's search for truth and our heart's desire for beauty and meaning. Stand Firm: Apologetics and the Brilliance of the Gospel argues that the gospel satisfies both of these needs. It is true and rational, but it is also inherently attractive and provides meaning and purpose. In short, the gospel is brilliant. It is brilliant, in one sense, because of the broad variety of evidences for its truth. But it is also brilliant given its beauty, goodness and the meaningful life it offers. The book provides up to date responses to questions about the existence of God, the reliability of the Bible, Jesus and the resurrection, and the problem of evil. It also treats unique topics such as understanding truth, knowledge and faith, the claims of alternate faiths, religious disagreement, etc. Each chapter attempts to connect these considerations with the gospel so that we may stand firm in our faith.
