Kastan and Farthing's *On Color* manages to be both provocative and playful, able to move from Bertrand Russell to "The Dress" of internet fame with intellectual dexterity and wit. And the book is not only a great read: the edition from Yale is beautifully designed, presenting its own feast of color from the dust jacket to the

Color, or colour, is the characteristic of visual perception described through color categories, with names such as red, orange, yellow, green, blue, or purple. This perception of color derives from

Acces PDF On Color

the stimulation of photoreceptor cells by electromagnetic radiation. Color categories and physical specifications of color are associated with objects through the wavelengths of the light that is reflected from them and their intensities. This reflection is governed by the object's physical
