Seeing the Insane is a richly detailed cultural history of madness and art in the Western world, showing how the portrayal of stereotypes has both reflected and shaped the perception and treatment of the mentally disturbed.

This book gives a cultural history of madness and art in the western world showing how mentally ill people have been depicted through the use of stereotypical images. Sources include manuscripts, engravings, drawings, paintings and sculptures from the middle ages to the end of the nineteenth century.

Seeing the Insane is a richly detailed cultural history of madness and art in the Western world, showing how the portrayal of stereotypes has both reflected and shaped the perception and treatment of the mentally disturbed.

An urgent expos é f the mental health crisis in our courts, jails, and prisons America has made mental illness a crime. Jails in New York, Los Angeles, and Chicago each house more people with mental illnesses than any hospital. As many as half of all people in America's jails and prisons have a psychiatric disorder. One in four fatal police shootings involves a person with such disorders. In this revelatory book, journalist Alisa Roth goes deep inside the criminal justice system to show how and why it has become a warehouse where inmates are denied proper treatment, abused, and punished in ways that make them sicker. Through intimate stories of people in the system and those trying to fix it, Roth reveals the hidden forces behind this crisis and suggests how a fairer and more humane approach might look. Insane is a galvanizing wake-up call for criminal justice reformers and anyone concerned about the plight of our most vulnerable.

"In this in-depth critique of the mental healthcare system, a leading advocate for the mentally ill argues that the system fails to adequately treat the most seriously ill. He proposes major reforms to bring help to schizophrenics, the severely bipolar, and others"--

Today the use of photography (and its extension, video) in psychiatry is a common practice. But in the 1850s, when pioneering medical photographer and psychiatrist Dr. Hugh W. Diamond was behind the camera, this technique was an innovative application of art to science, reflecting and expanding the contemporary interest in physiognomic characteristics. In "The Face of Madness," notable scholar Sander Gilman has curated a unique exhibition of 54 of Dr. Diamond's photographs and commentary. Diamond's photographs are eloquent portraits of the insane-the melancholy, the depressed, the deranged, the alcoholic-whom he cared for at the Surrey County Lunatic Asylum. In addition to their psychiatric significance, these photographs are notable works of art since Diamond was a pioneer in experimenting with and refining photographic techniques. Diamond's paper "On the Application of Photography to the Physiognomic and Mental Phenomena of Insanity," is included in this printing. This discourse discloses three functions of photography which are still relevant to the practice of psychiatry today: Photography can record the appearance of the mentally ill for study; it can be used for treatment through the presentation of an accurate self-image; and it can record the visages of patients to facilitate identification in case of later readmission. In addition to Diamond's paper, notes and analysis by Dr. John Conolly are also included in this volume. Dr. Conolly, one of Dr. Diamond's associates, was widely considered to be the leading British psychiatrist of the mid-nineteenth century. His patient case studies accompany 17 of Diamond's photographs. These reports include clinical information as well as diagnoses based on the theories of the physiognomy of insanity accepted at that period. "The Face of Madness" is a book to be treasured not only by psychiatrists, but also by photographers and medical historians. As Eric T. Carlson writes in the Introduction: "Until now these photographs have been known only through the sketches made from them. Professor Gilman has performed a great service in locating them and by giving us their history." Sander L. Gilman, PhD, is a distinguished professor of the Liberal Arts and Sciences as well as Professor of Psychiatry at Emory University. A respected educator, he has served as Old Dominion Visiting Professor of English at Princeton; Northrop Frye Visiting Professor of Comparative Literature at the University of Toronto; Mellon Visiting Professor of Humanities at Tulane University; Goldwin Smith Professor of Humane Studies at Cornell University; and Professor of the History of Psychiatry at Cornell Medical College. He has written and edited several books including "Sexuality: An Illustrated History" and "Seeing the Insane."

From the New York Times bestselling author of Adulting comes a story about how to make something when you ' re capable of nothing. Kelly Williams Brown had 700 Bad Days. Her marriage collapsed, she broke three limbs in separate and unrelated incidents, her father was diagnosed with cancer, and she fell into a deep depression that ended in what could delicately be referred to as a " rest cure " at an inpatient facility. Before that, she had several very good years: she wrote a bestselling book, spoke at NASA, had a beautiful wedding, and inspired hundreds of thousands of readers to live as grown-ups in an often-screwed-up world, though these accomplishments mostly just made her feel fraudulent. One of the few things that kept her moving forward was, improbably, crafting. Not Martha Stewart—perfect crafting, either—what could be called " simple," " accessible " or, perhaps, " rustic " creations were the joy and accomplishments she found in her worst days. To craft is to set things right in the littlest of ways; no matter how disconnected you feel, you can still fold a tiny paper star, and that ' s not nothing. In Easy Crafts for the Insane, crafting tutorials serve as the backdrop of a life dissolved, then glued back together. Surprising, humane, and utterly unforgettable, this is a poignant and hysterical look at the unexpected, messy coping mechanisms we use to find ourselves again.
