Do you want to feed your furry best friend in a healthy and sustainable manner? Are you tired of reading scary dog food recalls that are putting your pets health at risk? Do you just want a simple solution that puts you in control, and allows for your dog to live a happier and healthier life? Then keep reading... When stepping into a grocery store or pet shop you are greeted with aisles and walls of different pet food options. All these bright colored packages of dry and wet foods creatively marketed to get your attention... unfortunately, most of these options are not necessarily the best and healthiest for your dog. Just as humans have switched from healthy, natural and traditional diets to processed and mass-produced foods, we have made the same choices on behalf of our dogs. We are feeding our dogs the same "fast food" day in and day out, and this limits their nutritional intake. Just as people need variety in their diet, so do dogs. After all, wouldn't you get tired of having spaghetti as your only meal for years on end? Luckily, there is a better way that is both simple and effective... a fresh food diet (either store-bought or homemade). Instead of eating biologically inappropriate foods full of questionable meat sources and additives that can cause health problems, your pup can enjoy simple freshly cooked meals. You might be wondering... won't this homemade cooking take a long time? Or isn't this more expensive than buying a bag of food at my local store? This book will guide you through the entire process and you will find preparing healthy food for your dog is easier and less expensive than you think. Here's just a tiny bit of what you'll discover inside our 'Dog Nutrition & Cookbook': The problems with commercial pet foods (these facts will shock and surprise you). The 7 major nutrients dogs need in their diet. How much should your dog eat? Do you own a puppy or a senior dog? A large breed or a small guy or gal? They all have a different set of nutritional demands, and it's all covered inside. 25 foods dogs should steer clear of at all costs. More than 17 'PAWSitively' delicious meal recipes and 5 treat recipes that your dog will love and are guaranteed to spoil her/him with nutritional goodness. An easy to follow and prepare 2 week meal plan that will save you time and money. How to properly read a dog food label and understand what's really inside your dogs food. How to make mealtime positive and even more effective with simple training tricks. ... and much, much more. This is a great book for those looking to get more information on dog nutrition and keeping their dogs healthy. There is a lot of conflicting and overwhelming information out there. This guide simplifies the process and silences the noise. Ready to get started and find out more? It's as easy as scrolling up and tapping "Buy Now".

Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

Human nutrition expert and author of the critically acclaimed What to Eat, Marion Nestle, Ph.D., M.P.H., has joined forces with Malden C. Nesheim, Ph.D., a Cornell animal nutrition expert, to write Feed Your Pet Right, the first complete, research-based guide to selecting the best, most healthful foods for your cat or dog. Human nutrition expert and author of the critically acclaimed What to Eat, Marion Nestle, Ph.D., M.P.H., has joined forces with Malden C. Nesheim, Ph.D., a Cornell animal nutrition expert, to write Feed Your Pet Right, the first complete, research-based guide to selecting the best, most healthful foods for your cat or dog. A comprehensive and objective look at the science behind pet food, it tells a fascinating story while evaluating the range of products available and examining the booming pet food industry and its marketing practices. Drs. Nestle and Nesheim also present the results of their unique research into some of the industry's secretive industry. Through conversations with pet food manufacturers and firsthand observations, they reveal how some companies have refused to answer questions or permit visits. The authors also analyze food products, basic ingredients, sources of ingredients, and the optimal ways to feed companion animals. In this engaging narrative, they explain how ethical considerations affect pet food research and product development, how pet foods are regulated, and how companies influence veterinary training and advice. They conclude with specific recommendations for pet owners, the pet food industry, and regulators. A road map to the most nutritious diets for cats and dogs, Feed Your Pet Right is sure to be a reference classic to which all pet owners will turn for years to come.

"The first comprehensive book to cover both raw and home-cooked diets specifically for dogs, written by an expert in dog food research and development"--Provided by publisher.

The definitive guide to feeding your dog a balanced and nutritious raw and home-cooked diet, from the founder of a natural pets product company with over thirty years of experience working with dogs. Many people want to prepare their dog's meals at home, but feel it is too complex. Raw and Natural Nutrition for Dogs provides a road map to the essentials of canine nutrition, written in easy-to-understand language. Pet owners seeking to give their dogs a better coat, better skin, and healthier teeth and gums, as well as longer lives and more stable temperaments, will benefit not only from the background data in this book, but also the step-by-step instructions and recipes for preparing these diets. The book includes charts with the recipes, instructions on keeping diets simple and balanced, guidelines on preparation, suggestions for finding ingredients, and how much to feed a dog by body weight. There are recipes for healthy adult dogs, as well as guidelines for puppies, senior dogs, and dogs with health conditions including pancreatitis, renal problems, gastric issues, allergies, heart disease, liver disease, and cancer. Tracing the history of feeding dogs, the author shows when commercial dog food rose and took hold of the market. She discusses canine nutritional needs and provides research on how home-prepared foods can meet pets' needs better than commercial, processed dog food. Written with thorough information for the seasoned raw feeder, this guide can also be easily followed by any newcomer to home-feeding. This revised edition includes new information on special care and feeding of pregnant, newborn, performance, and toy breed dogs as well as senior dog considerations and the safety of the raw food diet for dogs.

Red State Blue State White House is a historical look at the Electoral College vote spanning over 150 years. It takes the reader on a state by state, region by region journey, along the way highlighting the nuances of the system. Interwoven into the journey are a re-created election, a mythical match-up and our present political reality. The book provides a great guide for following and predicting the 2008 race for the White House.

Choosing the right dog food in a world with too many choices

Walking down the dog food aisle in a pet supply superstore can present you with an overwhelming number of choices. Reading about dog food on the internet can make your head spin with so many opinions and stories. And judging the content that you find on dog food packaging can be confusing and misleading. How can the average dog owner make an informed choice in accordance with her dog's age, size and condition? In her latest book, author Linda Case describes how to make logical, evidence-based decisions for what to feed your dog amid all the options available.

You will learn

- How pet food marketers appeal to your emotions to persuade you to buy a particular type of dog food.
- To distinguish between scientific, evidence-based information and the anecdotal evidence which is so pervasive-and often misleading-in the dog food arena.
- Is there a scientific basis for dog foods designed specifically for puppies, senior dogs, canine athletes-even various breeds of dogs?
- How to read and evaluate all of the material included on a typical package of dog food from the ingredients and label claims ("Natural," "Anti-Oxidant," "Low Fat"), to the Nutrient Analysis and Nutritional Adequacy statements.
- How to avoid choice paralysis and the cognitive traps that can interfere with clear decision making.

What experts are saying about Dog Food Logic

Pet food is like a religion for many-but now those strong emotional ties can be backed up with fact. Linda Case separates fact from fiction, explains the complex terms and offers a guide to pet nutrition in simple to comprehend language. Unlike other books on this topic, there is no agenda here-except to present facts and then allow pet owners to make their own logical conclusions, letting the kibble drop where it may.

Steve Dale, CABQ, columnist Tribune Content Agency; radio host Black Dog Radio Productions and WGN Radio (Chicago); contributing editor USA Weekend; special correspondent Cat Fancy; author Good Cat!

Dog Food Logic is the indispensable guide to the science behind canine nutrition that will help us to make wise, well-informed choices about how and what we feed our dogs. It takes the fear out of trying to understand proper nutrition and will empower us to determine what is best for the health of our dogs.

Claudia Kawczynska, Founder and Editor-in-chief of The Bark

Don't read this book if you want someone to tell you what to feed your dog. This is a book for people who want to learn, in a reasoned and thoughtful way, how to figure it out for themselves. *Dog Food Logic* goes way beyond the usual textbook list of nutritional requirements to cover the pet food industry in all its glory: the history, the business, the marketing, and best of all, the science. Case deftly navigates the most controversial topics in pet food and presents the big picture without interjecting judgment about what approach is best. There's something here for everyone: pet care professionals and dog lovers alike will learn something new from this informative, easy to read, and well researched book.

The 2007 pet food recalls followed a multitude of pets getting sick and dying from contaminated food; now pet owners must take charge of what they feed their dogs and cats. With The Ultimate Pet Food Guide, veteran dog trainer, behaviorist, and author Liz Palika focuses on nutritional needs and covers every type of feeding, including controversial raw diets, homemade cooked food, and commercial foods. Palika also addresses introducing new foods; what "human foods" pets shouldn't eat; free-feeding; responsibility for food safety; where ingredients come from; and red flags in ingredients. Included are over fifty veterinarian- and pet-nutritionist-approved recipes and diets tailored to special-needs pets, such as puppies/kittens and pregnant, older, overweight and/or more sedentary animals.
