After defining the problem of early reading failure in our schools, renowned authors Robert Slavin and Darrell Morris include chapters on effective classroom reading instruction for kindergarten and first grade, one-on-one tutorial instruction, and reading instruction strategically organized on a school-wide basis.

Taking a developmental position, the authors describe specific assessment, instructional, and management procedures that will be useful to both in-service and pre-service teachers. The information is practical and detailed, blending classroom-tested pedagogical knowledge with the latest research findings. This text appeals to both teachers working directly with children and administrators who are looking for strategic answers to complex questions about beginning reading instruction.

It covers the history and development of the juvenile justice system and the unique issues related to juveniles, offering evidence-based suggestions for successful interventions and treatment and examining the new balance model of juvenile court. This new edition not only includes the latest available statistics on juvenile crime and victimization, drug use, court processing, and corrections, but provides insightful analysis of recent developments, such as those related to the use of probation supervision fees; responses to gangs and cyber bullying; implementing the deterrence model (Project Hope); the possible impact of drug legalization; the school-to-prison pipeline; the extent of victimization and mental illness in institutions; and implications of major court decisions regarding juveniles, such as Life Without Parole (LWOP) for juveniles. Each chapter enhances student understanding with Key Terms, a "What You Need to Know" section highlighting important points, and Discussion Questions. Links at key points in the text show students where they can go to get the latest information, and a comprehensive glossary aids comprehension.
